

ABSTRACT OF THE DISCLOSURE

An information storage medium includes: a plurality of unit audio information to be reproduced independently of each other; aggregate audio
5 information each including one or more of the unit audio information; unit attribute information indicating attributes of the unit audio information included in the aggregate audio information; and aggregate attribute information including the unit attribute information corresponding to the aggregate audio information recorded on the storage medium. By referring to the aggregate
10 attribute information, the attributes of all the unit audio information may be readily and quickly obtained.
